Human transcriptions

Timestamped human transcriptions are also available to be ordered in English. They are ordered directly from the UI and will allow you to take advantage of all of the same abilities to highlight the transcriptions to make insight clips of your videos. Additionally, they can be downloaded in the same formats as machine transcriptions (docx, txt, vtt, and srt). For more details on pricing and how to make human transcription available on your project, please reach out to your project manager or support@qualboard.com
