

# Using Group or User Logic Rules

Last Modified on 07/03/2024 8:23 am EDT

1 of 7

Logic rules are applied to the question that you want to be shown based off of a set of conditions. To begin, click the logic tab on the question you would like to be shown.

---

You're well on your way! Click **Next** for the next step.

2 of 7

Click the add button for "Users/Group Tag Display Logic" if you are showing the question to specific users or groups. If you are showing the question based off of answers to a specific question(s), click [here](#).

---

3 of 7

First, select if you want to limit based off of group tags or users. Then select the appropriate condition for your rule (example contains any of the following tags or contains none of the following

tags). Finally, select the users or tags to complete the logic rule. Click to finish the logic rule, then save the question.

---

*4 of 7*

If you want to create multiple logic rules, simply click to add another rule. Then select the operator you want to use. "AND" will make it so the question only displays if both rules are met. "OR" will display the question if either rule is met.

---

*5 of 7*

We realize sometimes you may need more advanced logic. This is where you may need to add multiple logic sets. If you are doing this, each individual set of logic can have the and/or operator similar to the logic mentioned in the previous step.

---

6 of 7

After you have saved the logic, you can view a preview of what the logic rule was by hovering over the purple logic icon in the responses or edit tab. This will show you what conditions a question would be shown to a respondent for.

---

7 of 7

If you ever delete a question or move it past the rule that it was based off of, you need to adjust your logic rule. Simply go back to the tab where you set it up and adjust the rule as needed!

We realize that logic can be one of the more complex parts of the system. If at any point you feel like you need more help, please reach out to [support@qualboard.com](mailto:support@qualboard.com)!
