Enabling Permissions for a QualMeeting - Firefox

Last Modified on 03/12/2024 2:26 pm EDT

If you try to enter a QualMeeting interview and your camera or microphone aren't enabled, you'll receive this error message at the top of the screen.

You're well on your way! Click **Next** for the next step.

If Firefox is blocking access to your Webcam or Microphone, you'll see "Blocked Temporarily." Click the X to remove these blocks for your meeting.

Now that the blocks are removed, the next time Firefox tries to access your camera or microphone you'll see this pop-up. Make sure you click "Allow" to enable access.
