Technical Requirements of QualBoard

QualBoard is a 100% browser based experience. The supported browsers are Chrome, Safari, Firefox, and Edge. Device wise, users need a device that can support the most up-to-date versions of any of our supported browsers. The mobile experience is fully optimized so you can answer most question types directly from your browser. Screen recording questions, QualLaborate markup questions, and specific features of Video Interviews are not supported on mobile devices.
