

# Technical Requirements of QualBoard

Last Modified on 04/01/2024 4:05 pm EDT

QualBoard 4 is a 100% browser based experience. The supported browsers for QualBoard are Chrome, Safari, Firefox, and Edge. Device wise, users need a device that can support the most up-to-date versions of any of our supported browsers.

For participants, the mobile experience is optimized and they can fully participate from their mobile browser. The only QualBoard feature that is desktop only is our QualLaborate markup so that participants can fully see what they are marking up and accurately place marks.
