

What is QualTranslate?

Last Modified on 07/05/2024 3:34 pm EDT

QualTranslate is a feature that allows you to instantly view posts that a participant makes in another language. Thanks to our automated machine translation, you can easily flip between the language the respondent posted in and the machine translation of the post.

We know machine translations aren't always perfect, so our system allows you to edit the translations directly in the UI.

When your project is finished, you also are able to easily export transcripts in both the original language and the translated language.

Have questions about QualTranslate? Reach out to your account manager or support@qualboard.com to learn more.
